

## Greek Life Info Meeting

---

Hi, my name is \_\_\_\_\_ and I work with a group in the Greek System called Greek Life. We are a Christian organization that exists in most every Greek System across the United States. I wanted to come and just take 3 minutes to make sure you know about us and let you know about some of the opportunities we provide.

I know many of you have a religious background, of course many of you do not as well. In either case we want to be a resource for you. If you think about four main areas of life; social, mental, physical, and spiritual- during college you tend to focus on the first three. At the same time you tend to neglect the latter. I think this can be dangerous because the latter, the Spiritual area, can actually be a guide to the other three. So while in college, as you are making some of the most important decisions about who you are and where you are going, you can neglect the area of life that actually gives direction to those areas.

We are here to help you make the Spiritual area an important part of your life. We have a large group meeting on Tuesday nights for the whole Greek System. We have small group Bible studies to explore how the Bible relates to life. We are also just available as a community for those of you that realize a need to have connection with a group of people that have common interests in pursuits in this area of life. That's really all I wanted to share and want you to feel invited to be a part of anything that we have going on.

I would also like to get some feedback from you on these things. We want to know where you all are coming from and if there is any way that you want to be connected to us. I have a short 2 minute questionnaire to pass out on which you can check the boxes that apply to you.
